Humidity is the concentration of water vapour present in the air. Water vapor, the gaseous state of water, is generally invisible to the human eye.

Humidity indicates the likelihood for precipitation, dew, or fog to be present..

Humidity depends on the temperature and pressure of the system of interest.

Humidity - Wikipedia

A heat pipe is a heat-transfer device that employs phase transition to transfer heat between two solid interfaces.. At the hot interface of a heat pipe, a volatile liquid in contact with a thermally conductive solid surface turns into a vapor by absorbing heat from that surface. The vapor then travels along the heat pipe to the cold interface and
